

May 3, 2002

To: Commissioner of Patents and Trademarks Washington, D.C. 20231

Fr: George O. Saile, Reg. No. 19,572 20 McIntosh Drive

Poughkeepsie, N.Y. 12603

RECEIVELL NAY 20 2002

Subject:

Serial No. 10/091,959 03/06/02

Yun-Fei Li et al.

EASILY MANUFACTURED EXCHANGE BIAS STABILIZATION SCHEME

Grp. Art Unit: 3729

INFORMATION DISCLOSURE STATEMENT

Enclosed is Form PTO-1449, Information Disclosure Citation In An Application.

The following Patents and/or Publications are submitted to comply with the duty of disclosure under CFR 1.97-1.99 and 37 CFR 1.56. Copies of each document is included herewith.

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner of Patents and Trademarks, Washington, D.C. 20231, on May 14, 2002.

Stephen B. Ackerman, Reg.# 37761

Signature/Date

- S.S.P. Parkin, "Systematic Variation of the Strength and Oscillation Period of Indirect Magnetic Exchange Coupling through the 3d, 4d, and 5d Transition Metals," Physical Review Letters, Vol. 67, No. 25, pp. 3598-3601, 1991, discloses that oscillatory indirect magnetic exhange coupling via transition metals sandwiched between ferromagnetic lyers of Fe, Co, Ni, or Ni alloys is a general phenomenon.
- B. Dieny, et al., "Giant magnetoresistance in soft ferromagnetic multilayers," Physical Review B, Vol. 43, No. 1, pp. 1297-1300, 1991, discloses that the in-plane magnetoresistance of sandwiches of uncoupled ferromagnetic (Ni81Fe19, Ni80Co20, Ni) layers separated by ultrathin nonmagnetic metallic (Cu, Ag, Au) layers is strongly increased when the magnetizations of the two ferromagnetic layers are aligned antiparallel.
- U.S. Patent 6,266,218 to Carey et al., "Magnetic Sensors Having Antiferromagnetically Exchange-Coupled Layers for Longitudinal Biasing," discloses a GMR with a Bottom SV and patterned exchange process.
- U.S. Patent 5,637,235 to Kim et al., "Shaped Spin Valve Type Magnetoresistive Transducer and Method for Fabricating the Same Incorporating Domain Stabilization Technique," discloses a BSV.

HT-01-032

- U.S. Patent 6,185,079 to Gill, "Disk Drive with Thermal Asperity Reduction Circuitry Using a Magnetic Tunnel Junction Sensor, " discloses an exchange biases DSV.
- U.S. Patent 5,856,897 to Mauri, "Self-Biased Dual Spin Valve Sensor, " discusses a GMR with AFM and FM layers.
- U.S. Patent 6,118,624 to Fukuzawa et al., "Magneto-Resistance Effect Element Having a Magnetic Biasing Film", discusses abutted junctions.
- U.S. Patent 6,313,973 to Fuke et al., "Laminated Magnetorestrictive Element of an Exchange Coupling Film, an Antiferromagnetic Film and a Ferromagnetic Film and a Maagnetic Disk Drive Using Same, " describes laminated exchange coupling.

Stephen B. Ackerman,
